

Adaptive HVAC Solutions

CUSTOMIZED CHILLER PACKAGES

Complete Systems To Meet Your Needs

OEM Customized Solutions...

What is “Adaptive HVAC Solutions”?

In recognizing our customers’ needs for specialized equipment not available from high-volume production plants, YORK created a unique facility in Indianapolis, Indiana to provide what we call “Adaptive HVAC Solutions”. This facility is dedicated to designing, manufacturing, and customizing individual equipment and packaged solutions to meet specialized application requirements.

Single-Source Accountability

With YORK, you’re working with a global organization that uniquely combines diagnosis of your needs, proper equipment selection, experienced application engineering & design, custom fabrication, total project management and service expertise. You are assured proper assessment and engineered solutions to specifically meet your needs, installation, setup, commissioning, system integration and ongoing maintenance services.

Who better to provide your total HVAC/R packaged solution than YORK - the trusted name in HVAC/R equipment with over 125 years of experience. When it comes to your next project, don’t risk improper configurations, misapplication, delivery delays, or confusion due to a third party involvement.

Factory Warranty Support & Expertise

Third party equipment modifications generally void OEM warranties. With YORK Adaptive HVAC Solutions, the original equipment warranty is preserved. YORK is there to support you with your project and has access to diverse areas of expertise committed to your success. From engineering, design, and project management to quality assurance and onsite services, YORK is there to serve your HVAC/R needs.

Modular Chiller Plants

Rental

Government & Military

Chiller & Boiler Hydronic Packages

Portable

N+1 Redundancy

Evaporative Cooled-Chillers

Nobody handles your tailored solution better than YORK

Which is Better: OEM Equipment Modifications OR Fully Custom Solutions?

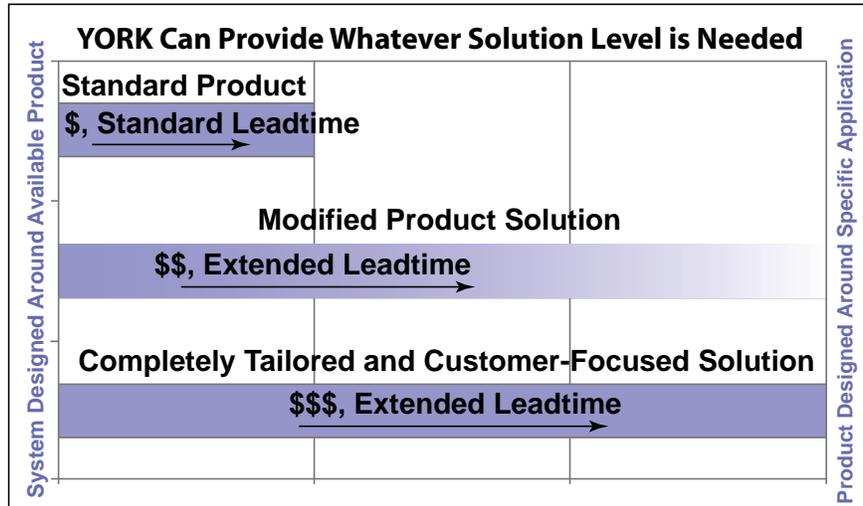

Why not have both? With YORK's tailored approach, you can! YORK's focus is on what best suits YOUR specific situation. While some manufacturers may redirect you to a third party or flatly refuse your request, YORK is here to work with you to satisfy your needs with solid engineered solutions that provide value... not frustration.

Standard Niche Products

YORK provides more offerings in niche-type markets with standard products that meet your needs. Further modifications and custom offerings are also available. These engineered products not only allow for satisfying more unique requirements, but offer the product quality you've come to expect from YORK.

YORK Support Team

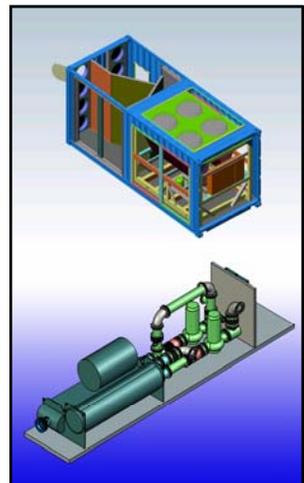

YORK's team includes engineering & design support that helps communicate solutions prior to turning the first bolt. This results in eliminating confusion, speeding up solutions, reducing manufacturing lead-times and minimizing rework. Supporting documentation is included with your package, making installation, servicing, and aftermarket support a breeze. YORK's global network of HVAC/R engineering & design experts allows us to help with your needs at home or abroad. With the industry's most experienced factory-trained service technicians involved, you'll know the job will be done right the first time.

Refrigerant Recovery

Engineering & Design

Factory Modifications: Unit Enclosure Additions, Desuperheaters, Low Ambient, Energy Recovery Wheels, etc.
